

Technical Requirements

Childsplay School Tours

Thank you for bringing Childsplay into your school. Whether this is your first time or your twentieth time to book a show with Childsplay, please take a moment to review the following technical requirements for our productions.

Parking: We will need to park our van within 16 feet of the performance space to unload the set. This may mean driving on campus, unlocking gates or re-routing buses / morning arrival traffic. Childsplay personnel are always happy to walk alongside the van when children are present. If necessary, we can re-park our van in a parking lot as long as we are able to easily re-park in the loading area at the end of the performance.

The Space: Childsplay tours are designed to perform in a variety of spaces: multipurpose rooms, gyms, cafeterias, auditoriums and meeting halls. Your space must meet the following requirements:

- Be indoors
- Be 25 feet wide by 25 feet deep by 11 feet tall (floor to ceiling)
 - This area must be clear – nothing should be stored within it.
 - It must be level
 - If this area is raised it must be able to be accessed by a ramp.
 - The parking area must be on the same level as the performance space. Exceptions can be made if there is a freight elevator or a ramp.
- There must be additional and adequate space for the audience (max. 350 people)
- Access to two electrical outlets.
- Access to adult bathrooms for our performers to change into costume.
- A dedicated door that is not in use by students for us to load in and load out the set.
- The route from the van to the performance area must be free of student traffic: this is for the student's safety as our set/prop pieces are often heavy and large. This may mean re-routing morning or lunch traffic.
- We may need to control the light in the room.
- We may need to borrow a table and chairs to keep props and costumes organized.

We will need to maintain use of this space for the entire time we are in your school. If we are in your space over lunch we cannot dismantle our set or put it back into the van.

Timing: The company will arrive one hour prior to the first performance. The school and the performance space must be available upon arrival. If a gate needs to be unlocked for us to get on campus please notify appropriate staff of our arrival time so they are ready for us. Childsplay shows typically last one hour including a question and answer session. **Please instruct classes to be seated in the performance space 15 minutes prior to the show so we may begin on time.** We require 45 minutes to load back into our van. If necessary, the question and answer session can be skipped to accommodate lunch and/or bus schedules.

Please remember that every Childsplay show is unique and different. Just because we were able to fit last time does not mean the current production can make the same adjustments. If you have any questions or concerns or would like a Childsplay production person to visit your space please contact Jaime Fox, 480.921.5751, jfox@childsplayaz.org.
